## LINING OUT EVERGREENS

Our pot grown evergreens are plunged in sand outside in frames and are therefore well hardened.

1 yr. refers to a growing season.

2 yr. means plants were outside two seasons.

We use 2½" rose pots for most items.

## EVERGREEN GRAFTS

The following list of varieties we graft each year. Others may be added if desired, and scions are available or furnished. We have stock plants of many varieties not listed below.

Junipers are grafted upon Juniper understocks only, mostly *virginiana*. We use 2½" deep rose pots for most understocks. Other varieties are on related understocks only.

Rhamnus Chadwicki (True Type)

One of the larger growing border shrubs — good glossy foliage — the best of the Rhamnus family. The larger, shiny black fruits are borne very profusely in clusters which cover the entire plant and which persist all through the winter. Shears well and makes a fine hedge. One of the best and most permanent.
